Silas Moracha

Information Technology Professional | Network & Systems Administration | Cybersecurity Specialist | Backend Engineer

morachasilas@gmail.com | +254 701 644 239 | Eldoret, Kenya | github.com/mcmnyages | linkedin.com/in/silas-moracha-590334229

PROFESSIONAL SUMMARY

Information Technology graduate with a strong foundation in network administration, systems support, cybersecurity, and backend software development. Holds 11+ industry-recognised Cisco and cloud security certifications including CCNAv7 (Introduction to Networks; Switching, Routing & Wireless Essentials), Network Security, Cybersecurity Essentials, and CCSKv4.1 cloud security. Gained hands-on IT support and network administration experience at Uasin Gishu County Government, contributing to system maintenance, configuration, and security monitoring. Additionally brings experience in software engineering, AI training data pipelines, and full-stack development. Eager to contribute technical expertise to public-sector ICT infrastructure and water sector digital initiatives under the Ministry of Water, Sanitation, and Irrigation.

EDUCATION

Bachelor of Science — Information Technology Sep 2021 – Nov 2025

Maseno University, Kisumu, Kenya

- Second Class Upper Division.
- Former Cybersecurity Lead, Maseno Google Developer Student Club (GDSC).
- Relevant coursework: Network Administration, Cybersecurity, Database Systems, Software Engineering, Cloud Computing, Systems Analysis.

WORK EXPERIENCE

IT Attachee — IT Department May 2024 – Jul 2024

Uasin Gishu County Government, Eldoret

- Maintained and troubleshot computer systems and network infrastructure supporting county-wide government operations.
- Delivered technical support to county staff on hardware and software faults, minimising operational downtime.
- Assisted in computer systems installation, configuration, and routine security monitoring.
- Supported network administration tasks including network configuration and performance monitoring.
- Assisted in IT help desk operations and end-user support across departments.

Software Engineering Expert — AI Training (Projects: Rewrite, Images, Pluto) 2025 – Present

AfterQuery Experts (YC W25) — Remote

- Designed and evaluated complex software engineering scenarios used to train frontier AI coding models.
- Authored port-management scripts enabling AI agents to autonomously detect and resolve port conflicts (ghost ports) — identifying occupied ports, terminating blocking processes, launching the agent's target service, then restoring the original process on completion.
- Produced expert-level reasoning traces and rubric-graded evaluations feeding directly into RLHF/RLAIF training pipelines.

AI Video Annotator — Computer Vision & Robotics Training 2025 – Present

Atlas Capture — Remote

- Annotated egocentric video footage of household tasks to generate labelled training data for computer vision and robotics AI models.
- Applied structured annotation frameworks classifying primary actions, hand dexterity, and object interactions at segment level.
- Maintained high accuracy across multi-stage quality review pipelines, contributing reliable datasets for embodied AI research.

Frontend Engineer Apr 2025 – Dec 2025

SecretStartups — Remote

- Designed and shipped responsive web interfaces using Vue.js 3, ensuring cross-device performance.
- Integrated RESTful backend APIs, improving data flow and reducing client-side latency.
- Collaborated with backend engineers, DevOps, and product teams to align technical delivery with business goals.

TECHNICAL SKILLS

Networking & Systems:	Network Configuration (OSPF, RIP, NAT, ACLs, VLANs), Cisco Routing & Switching, Wireless LAN, Network Monitoring, Windows Server, Linux System Administration
Cybersecurity:	Network Security, Penetration Testing, Ethical Hacking, Vulnerability Assessment, OWASP Top 10, Incident Response, Burp Suite, Wireshark, Nmap, Metasploit, CTF (Web Exploitation, Crypto, Binary)
Backend Development:	Django, Node.js, Express.js, PHP, REST API Design, JWT Authentication, MySQL, MongoDB, PostgreSQL
Frontend Development:	Vue.js 3, React, Angular, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Responsive Web Design
Cloud & Data:	Cloud Security (CCSKv4.1), AWS/Azure fundamentals, AI Training Data, RLHF Annotation, Computer Vision Labelling
Developer Tools:	Git, GitHub, Linux, Docker (familiar), VS Code, Android Studio, CI/CD concepts
Programming Languages:	Python, JavaScript, Java, Kotlin, C++, PHP, SQL

CERTIFICATIONS & CREDENTIALS

- **CCNAv7: Introduction to Networks**
  Cisco Networking Academy
- **CCNAv7: Switching, Routing & Wireless Essentials**
  Cisco Networking Academy
- **Cisco: Network Security**
  Cisco Networking Academy
- **Cisco: Cybersecurity Essentials**
  Cisco Networking Academy
- **Cisco: Introduction to Cybersecurity**
  Cisco Networking Academy
- **Cisco: IT Essentials**
  Cisco Networking Academy
- **Cloud Security Alliance: CCSKv4.1 Foundation Training**
  Cloud Security Alliance
- **CPA: Programming Essentials in C++**
  Cisco Networking Academy
- **PCAP: Programming Essentials in Python**
  Cisco Networking Academy
- **Cisco: Get Connected**
  Cisco Networking Academy
- **Cisco: Creating Compelling Reports**
  Cisco Networking Academy
- **In Progress: Cisco Certified Ethical Hacker (CEH)**
  Cisco

KEY PROJECTS

Self-Managed Voting System — Django, MySQL, Bootstrap, JavaScript

- Secure web-based election platform with blockchain-inspired immutability, role-based authentication, real-time monitoring, and a fully auditable interface for transparent results management.

Django University Timetable System — Django 5.1, MySQL, Bootstrap, JavaScript

- Comprehensive scheduling system with dynamic timetable generation, conflict detection, and role-based access (Admin/HOD/Instructor) secured with custom authentication layers.

Image-to-Text OCR System — Python, OpenCV, Tesseract

- Real-time pipeline to extract and digitise text from camera-captured images with full preprocessing workflow and multiple export formats.

Ghost Port Management Script — Python, Bash, Linux

- Authored for AfterQuery AI agents: detects occupied ports, gracefully terminates blocking processes, launches the target service, then restores the original process — enabling autonomous isolated development environments.

ACHIEVEMENTS & AWARDS

- **2nd Runner-Up** — Communication Authority of Kenya Cybersecurity Hackathon, CA Bootcamp, Ciala Hotel, Kisumu.
- **Cybersecurity Lead** — Maseno GDSC; organised security workshops, CTF events, and awareness campaigns for 100+ students.

- **Active CTF Competitor** — national and online platforms; web exploitation, cryptography, binary exploitation, and network forensics.
- **GitHub Achievements** — Pull Shark (x2), YOLO, Quickdraw; 23+ public repositories.

LANGUAGES

English — Fluent (written & spoken)
